

ENVIRONMENTAL POLICY

Archwood Limited senior management are committed to the protection of the environment and the prevention of pollution that may result from its operations as a manufacturer and supplier of predominantly timber based products for the building and home improvement sector. It is also therefore committed to the procurement of timber from responsible and sustainable sources.

Archwood Limited senior management are also committed to the continual improvement of its environmental performance by also ensuring all its legal compliance obligations are met. They have therefore implemented an Environmental Management System (EMS) which meets the requirements of BS EN ISO 14001. Archwood Limited also considers the requirements of its interested parties that may be deemed to have an impact on the (EMS) and sets objectives and targets to enhance and improve its environmental performance whilst complying with all of its legislative requirements.

A full set of procedures have been established and will be maintained to ensure that the EMS remains effective considering the nature and extent of the business. Activities are carried out with due consideration to their environmental impact. The effectiveness of the (EMS) is reviewed regularly to ensure continual improvement.

It is considered the duty of everyone working within Archwood Limited to familiarise themselves with the company procedures and the aims of this policy statement. Individual objectives and targets are set as appropriate.

Josh Burbidge - Managing Director
